

GIANT FLOWERED GARDEN CHIVES

ALLIUM SHOENOPRASUM 'FORESCATE'

THIS LARGE FLOWERED SELECTION OF GARDEN CHIVES PROVIDES PLEASURE FOR THE EYES AS WELL AS THE TASTE BUDS. JUST AS EDIBLE AS THE MORE FAMILIAR GARDEN CHIVES, FORESCATE CHIVES HAS AN EXTRA LARGE (EDIBLE!) FLOWER THAT JUSTIFIES PLANTING IT FOR THE VISUAL APPEAL ALONE. GROWING TALLER AND MORE VIGOROUSLY THAN COMMON CHIVES AT 14-16" IN HEIGHT, IT IS A GREAT ADDITION TO THE HERB GARDEN. THOUGH QUITE ATTRACTIVE TO BUTTERFLIES AS WELL AS TO HUMANS, CHIVES ARE NOT ON THE FAVORED LIST FOR DEER OR RABBITS. EASY, EDIBLE, AND LOVELY.

SUN TO PARTIAL SHADE

ZONES 2-9
