

GOLDEN BARBERRY

BERBERIS THUNBERGII 'AUREA'

DOES YOUR GARDEN NEED BRIGHT IN A BIG WAY? EVEN WITHOUT A BLOOM IN SIGHT, GOLDEN BARBERRY BRIGHTENS THE MOST COLOR CHALLENGED OF SPACES. CLOTHED IN YELLOW FROM HEAD TO TOE, THIS DECIDUOUS SHRUB REACHES 3 ½-4' TALL BY 5-6' ACROSS AND HAS A SOFT, MOUNDED SILHOUETTE. LOOKING PARTICULARLY LOVELY WITH BLUES AND PURPLES, IT PROVIDES A STEADY PRESENCE ALL SUMMER LONG AND IS QUITE DEER RESISTANT. THE TINY BLOSSOMS ARE PALE YELLOW AND ARE NOT ENTIRELY OBVIOUS TO HUMANS WHERE THEY HANG BELOW BRANCHES, BUT BEES FIND AND LIKE THEM JUST FINE. TOLERATES BOTH DRY AND MOIST CONDITIONS AND THRIVES IN CLAY SOIL. NICE FALL COLOR, TOO!

MOSTLY SUN TO PART SHADE

ZONES 3-10
