

BERKELEY SEDGE

CAREX ONULSA

HERE IS A NICE, TUFTY "GRASS" THAT ADAPTS WELL TO SO MANY SITUATIONS: DRY OR SOGGY WET, SUN OR SHADE.

LOVELY AS A PART OF A MIXED PLANTING WITH WILDFLOWERS (SEEN HERE WITH MEADOW PENSTEMONS) IT WILL HELP YOU GREEN UP YOUR SPACE AND ASK LITTLE IN RETURN. GREAT FOR HOLDING BANKS AND PLANTED EN MASSE TO MAKE A "LUMPY LAWN".

REACHING 15" HIGH IN BLOOM AND 2' ACROSS, THIS ONE IS EASY TO TUCK INTO ALL KINDS OF SPACES AND IS PARTICULARLY PRETTY IN DRIFTS NEAR WATER. DEER RESISTANT, EVERGREEN, AND SELF SOWING.

USDA ZONES 4-10

SUN TO SHADE
