

EMBERGLOW CROCOSMIA

CROCOSMIA X CROCOSMIIFLORA

HOT, RED-ORANGE TUBULAR

'EMBERGLOW'

BLOSSOMS APPEAR ON 2-3' STALKS IN LATE SUMMER, LOOKING MUCH LIKE FREESIA'S MORE GRACEFUL (AND HARDIER!) COUSIN.

SOUGHT AFTER BY HUMMINGBIRDS, THE BLOOMS OF CROCOSMIA APPEAR WHEN MANY OTHER PLANTS ARE LOOKING TIRED AND WORN OUT FOR THE SUMMER. OUR GRANDMOTHERS AND THEIRS PLANTED CROCOSMIA WHICH THEY CALLED MONTBRETIA, FOR USE IN CUT FLOWER ARRANGEMENTS AND FOR GENERAL GARDEN PLEASURE.

A CLASSIC, TIME PROVEN GARDEN DELIGHT, THIS ONE IS CARE FREE, EASY, LONG LIVED AND A REAL LIFT FOR SPIRITS WEARIED BY THE LONG, HOT DAYS OF AUGUST.

SUN TO PART SHADE

ZONES 5-9
