

HARDY ICE PLANT

DELOSPERMA COOPERI

HARDY ICE PLANT IS A TRIED AND TRUE, FROST TOLERANT SUCCULENT THAT SPREADS AS FAR AS YOU WILL LET IT. ESPECIALLY NICE TRAILING OVER WALLS, THE VIVID MAGENTA FLOWERS APPEAR FROM SPRING INTO SUMMER, MAKING A SCREAMING, HOT PINK BLANKET SOMETIMES SO THICK THAT YOU CAN'T SEE THE GREEN OF THE LEAVES BELOW. TOUGH AS NAILS, IT IS DROUGHT AND HEAT TOLERANT AND MAKES A GREAT COVER FOR STEEP SLOPES AND BANKS WHERE LITTLE

ELSE WILL GROW. PROVIDE GOOD DRAINAGE AND CUT BACK REGULARLY FOR BEST RESULTS.
