

MANGO LASSI AVENS

GEUM 'MANGO LASSI'

THIS LONG BLOOMING AVENS BEARS BLOSSOMS IN MOUTH WATERING SHADES OF APRICOTTO PEACH. TRUE TO ITS NAMESAKE, THE COLOR LEAVES YOU THINKING OF THE FRESH FRUITNESS OF MANGOS. ITS EVERGREEN, LEATHERY LEAVES ARE A LOVELY, RUMPLY-TEXTURE, AND THE BLOOMS APPEAR MAY TO SEPTEMBER (THIS PICTURE WAS TAKEN IN FEBRUARY!). COMPACT PLANTS ARE ONLY ABOUT 12" X 12", SHORTER THAN YOUR AVERAGE AVENS, BUT LIKE ITS COUSINS, MANGO LASSI CARRIES MOST OF ITS HEIGHT IN THE DELICATE, BLOOMING FLOWER STALKS, WHICH DANCE ABOVE THE GROUNDED FOLIAGE. ITS FORM AND TIDY APPEARANCE MAKES IT GREAT FOR THE FRONT OF THE BORDER!

SUN TO PARTIAL SHADE
