

# YELLOW ARCHANGEL

## LAMIUM GALEOBDELON

A ROBUST GROUND COVER FOR SHADY AREAS, YELLOW ARCHANGEL SPREADS QUICKLY, FILLING THE "HARD TO GROW ANYTHING IN" AREAS WITH ITS ATTRACTIVE VARIEGATED FOLIAGE. DID I SAY SPREADS? PLANT IN AREAS WHERE LITERALLY NOTHING ELSE WILL GROW, SUCH AS IN THE SHADE OF MATURE CONIFERS AND ALLOW IT FREE REIGN THERE. IT WILL SOON LIGHT THE AREA WITH ITS LUSH SILVERY FOLIAGE AND SOFT YELLOW BLOOMS IN SPRING. QUITE DEER RESISTANT AND DROUGHT-TOLERANT, THIS IS A TOUGH PLANT BEST GROWN IN PROBLEM AREAS, NOT IN MIXED BORDERS. VERY NICE FOR HANGING BASKETS IN THE SHADE!

ZONES 4-9
