

LEOPARD LILY

LILIUM PARDALINUM

FOUND IN MANY PARTS OF CALIFORNIA, THIS BEAUTIFUL NATIVE LILY GROWS IN DAPPLED SHADE AREAS NEAR STREAM BANKS. ONE OF OUR BELOVED WILD FLOWERS, LEOPARD LILY MAKES QUITE AN IMPRESSION WHEN THE BLOOM STALKS SHOOT UP TO AS MUCH AS 6' TALL IN SUMMER, SPORTING ITS FESTIVE SPOTTED ORANGE LANTERNS. HIGHLY ATTRACTIVE TO HUMMINGBIRDS, THE CRIMSON RED AND ORANGE NODDING BLOSSOMS ARE 2 TO 4 INCHES WIDE AND HELD ON BRANCHED "CANDELABRAS", A VISION YOU WON'T LIKELY SOON FORGET. A TRUE CALIFORNIA TREASURE.

MOSTLY SHADE TO SHADE

ZONES 5-10
