

GOLDEN CURRANT

RIBES AUREUM

THIS TOUGH CALIFORNIA NATIVE SHRUB WILL FILL A SIZABLE SPACE AT 6-9 FEET TALL AND AS MANY ACROSS. THE ARCHING CANES, HIGHLY ATTRACTIVE TO HUMMINGBIRDS AND NATIVE POLLINATORS WHEN STUDED WITH CLUSTERS OF FRAGRANT GOLDEN BLOSSOMS IN SPRING, ARE

PRICKLE FREE, AS ARE ALL THE CURRANTS, BUT STILL QUITE DEER RESISTANT. UNLIKE MANY OF ITS CURRANT RELATIVES, GOLDEN CURRANT IS QUITE DROUGHT AND HEAT TOLERANT. THE EDIBLE BERRIES ARE TASTY, IF YOU CAN BEAT THE BIRDS TO THEM, AND PLANTS WILL FRUIT BETTER WITH CROSS POLLINATION. BEAUTIFUL AND EASY.

ZONES 3-8

SUN TO PART SHADE
