

BERTRAM ANDERSON STONECROP

SEDUM 'BERTRAM ANDERSON'

STONECROPS ARE WELL KNOWN FOR THEIR DROUGHT AND POOR SOIL TOLERANCE, AND THIS ONE IS NO EXCEPTION. FORMING AN 8" TALL GROUND COVER, 'BERTRAM ANDERSON' DELIGHTS WITH ITS STUNNING COLOR COMBINATION OF DARK, BRONZY-PURPLE LEAVES AND PINK FLOWERS. SPREADS BOTH RHIZOMATOUSLY AND BY ROOTING WHERE ITS LONG STEMS COME INTO CONTACT WITH SOIL, IT WILL BE NO TIME BEFORE YOUR PATCH OF THIS STUNNER SPREADS TO A SIGNIFICANT SIZE. TRAILING BEAUTIFULLY OVER WALLS OR OUT OF CONTAINERS, IT PROVIDES GREAT CONTRAST TO MIXED PLANTINGS.

SUN TO PART SHADE

ZONES 3-9
